

**Question: How do I determine what permit I should buy?**

Answer: Determine the length of your loaded firewood in your cargo area and choose the appropriate length from the permit list.

Example: If you have an 8' bed and you only load 5' due to weight restrictions or desired amount then choose the 5.5' or less permit.

**Question: I rent a different vehicle or trailer every time I cut wood. Do I need to register a vehicle?**

Answer: All vehicles and trailers must be registered. You may register as many vehicles or trailers as you wish. If your vehicle or trailer is not listed, you must add it to your profile.
